

Team Anything Works: Sprint 2 retrospective

Practices we should continue:

- Rapid responses to discord communications
- Self-organization into teams to work on assigned sub-tasks

Practices we should discontinue:

- Leaving our sprint work to the last minute
- Focus on tasks as opposed to user stories

Harmful practices:

- Leaving our sprint work to the last minute
- Not relaying what is done and not on JIRA

Best experiences:

- the coordination we have after 2 sprints and our ability to just jump right into our work

Worst experiences:

- cramming sprint work at the last minute

Unfinished tasks:

- the user stories we started but didn't finish include TEAM-3, TEAM-5, and TEAM-6 (we are taking them back up for sprint 3)

Participants:

- all team members (Ahmed, Xiaohan, Juefei, Vanshika, Tien, Faizan, and Parth) attended this meeting. However, the product owner was not in attendance this time.
