

Team Anything Works: Sprint 3 retrospective

Practices we should continue

- Rapid answering of discord communications
- Group meetings to help resolve roadblocks and issues

Practices we should discontinue

- Having long periods of inactivity on the project
- Not working on the critical path

Harmful practices

- Not being prepared for the demo

Best experiences

- Pacing our work and being able to spread it out over the sprint rather than cram at the last minute

Worst experiences

- Being very disorganized during the sprint demo

Unfinished tasks

- Two user stories (TEAM-5 and TEAM-6) while technically working did not meet our definition of done and hence were marked as incomplete (They are currently marked for completion in sprint 4)

Participants

- all team members (Ahmed, Xiaohan, Juefei, Vanshika, Tien, Faizan, and Parth) attended this meeting. However, the product owner was not in attendance like last sprint
