A: TEAM-38/general CSS styling

B: TEAM-37/general frontend/backend connectivity

C: TEAM-3/Applicant upload video portfolio

D: TEAM-6/Applicant upload tailored elevator pitch

E: TEAM-5/Applicant view job description

F: TEAM-9/Applicant view applied jobs history

G: TEAM-39/user authentication improvements

H: TEAM-22/Employer modify profile

For this sprint, our critical path is identified by nodes C and E on the diagrams. They represent the user stories for uploading an elevator pitch and applying to a job (as part of viewing a job description). To keep the sprint on schedule, we started work as early as we could but regardless we were hampered by midterm season and other assignments. Nodes C and E are required to work on node D which represents the uploading of a tailored elevator pitch as part of the job application process. The remaining tasks are not on the critical path and therefore give us a lot of flex time to complete them as we wish. We unfortunately didn't finish our work this sprint because of the fact that we left everything to the end due to extenuating circumstances.
